**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. **Claims 10-18 and 37-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Altman (WO 01/26585) in view of Girouard et al. (2003/0069606).**

Altman discloses a method of treating atrial arrhythmia, the method including delivering an unexpanded implant (see page 7, lines 5 and 6) expanding the implant (see page 8, lines 1-5) such that the implant migrates into the wall of the vein (the barbs migrate into the vein walls). By implantation of the stent, the stent forms a conduction block to isolate or block the electrical impulses of the pulmonary veins from the atrial conduction tissue. The barbs can form scar tissue that also blocks the electrical impulses. However, Altman does not disclose the treatment creates circumferential scar tissue. Attention is drawn to Girouard et al. who teach creating circumferential scarring (see paragraph 13) to eliminate a conduction pathway between the vein and the left atrium. Therefore, it would have been obvious to one of ordinary skill in the art at the time invention was made to have created circumferential scarring upon implantation and expansion of the stent of Altman in the manner taught by Girouard et al. to eliminate a conduction pathway between the vein and the left atrium.

***Response to Arguments***

3. Applicant's arguments with respect to claims 10-18 and 37-41 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

5. A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
